

Routines for controlling the validity of vaccination certificates against Covid-19

The following routines are set up in order to control the validity of vaccination certificates against Covid-19 during sittning and clubs held by Östgöta Nation.

- The controlling is done through the app “Vaccinationsbevis verifiering”. The app verifies the person’s name, date of birth and whether the person is fully vaccinated against Covid-19 by scanning the QR-code on their vaccination certificate. This applies to European vaccination certificates.
- All persons responsible for kitchen, bar and sexmästeri (i.o.w. foremen) are to be fully vaccinated. Their vaccination certificates are controlled by sitting Quratel.
- All other workers are to be fully vaccinated as well, their vaccination certificates are controlled by responsible foremen of the evening.
- Sitting Quratel will during some evenings control a few chosen workers in order to ensure that the vaccination requirement is taken seriously.
- All workers standing in the entrance to the sittning or club will be required to control entering guests' vaccination certificates through the aforementioned app.

If questions arise please contact the Qurator at q@ostgota.nu
